

## **Xacti VPC-E1 6MP Waterproof MPEG4 Camcorder with 5x Optical Zoom (two available)**

Practically four cameras in one, the Xacti E1 allows you to shoot both photos and video at a park, birthday party or virtually anywhere else on dry land. And, when the opportunity presents itself, also shoot both photos and video while snorkeling or while just playing around in a swimming pool. This powerful little camcorder easily records both full 640x480 resolution video at 30 frames-per-second and high-resolution 6-megapixel digital still images, all of which are handily stored to a standard SD or SDHC flash memory card. **Price: \$419.99 each** from Amazon.com

### **FEATURES:**

**Large, 2.5-inch Liquid Crystal Display (LCD)** The display flips out from the camera and rotates up to 285 degrees on an axis that allows you to take great video or still images from otherwise-difficult-to-view positions, proving to be especially useful when shooting underwater or in small rooms.

**Record up to a total of 10 hours of full motion video** Or capture up to 4000 6-megapixel still images on a 8GB SDHC memory card, up to 5 hours of video with a 4 GB SDHC memory card, up to 2.5 hours with a 2GB standard SD card, and up to 1.25 hours with a 1GB standard SD card.

**Import files directly into iTunes software** Easy transfer to your video-capable iPod allows you to share a quick video the next time you are asked how the kids are doing!

**Ever need to capture still images while you're already shooting video?** The E1 enables simultaneous shooting of both 6-megapixel still images and 640 x 480-pixel video clips with a simple press of the shutter button during the shooting of a movie clip. You will never need to miss another precious photo opportunity.

**Sophisticated image stabilizer** Using a proprietary Sanyo algorithm, the E1 automatically compensates for distracting up-and-down or side-to-side camera movement, keeping your subject steady and easy to follow.

**5x optical zoom with a bright maximum aperture of f/3.5** Consisting of 9 groups and 12 total lenses, the E1's lens provides a fantastic field-of-view with a 38-190 mm range (35mm equivalent). Combined with the 12x digital zoom, the E1 provides up to 60x zooming capability.

**Super-fast start-up** Reduce your chance of missing the moment. The Xacti E1 media camera is designed for super fast start-up and shooting. With the tapeless design, the E1 eliminates the need to queue up a tape deck, allowing the E1 to begin shooting in as little as 1.7 seconds!

**Includes a high-capacity Sanyo brand lithium-ion battery** The DBL-L20U is a high-voltage, 3.7-volt battery designed to work with the Sanyo Xacti E1 camera. High-energy density design minimizes the battery size and weight, making it perfect for use in small, portable cameras. The DBL-L20 is designed to resist memory accumulation so it provides a full charge every time.

**Easy playback of recorded video directly on a TV** Connect the E1 to a VCR or DVD Recorder to back-up copies of recorded content. Still images and video clips on the Xacti E1 are played back continuously and in chronological order. The Xacti E1 offers convenient connection to a PC. With simple drag-and-drop operation, it's easy to save recorded video clips and still images onto a computer's hard disk for emailing, editing or archiving.
